A battle royale game is a game of mid-set because you have to kill everyone who comes on your path to be the last man standing so lots of people choose the easiest way to be the last man standing and archive Booyah every time and that way is free fire mod apk because in free fire mod apk you will See through the Walls attribute and that will help you to see through the wall and kill any enemy through the wall without making them aware about you. There are lots of tips & tricks that we are sharing with you that will help you in your game and helps to improve your gameplay. We share our experience that we really try in the game and go to the global position in the Top 100. With these tips and tricks you really increase your rank and reach the Heroic spot easily: The first Tip that we really want to share with you that don't fire first, if you are looking to push your rank to Heroic then don't fire first.When you see the enemy and the enemy didn't see you.If you play solo and Duo then try to survive at least at top 10 (in Solo) and top 5 (in Duo). If you are looking to push rank in squad mode then search the squad members that listen to you and going for Booyah that really helps to increase your rank and the Heroic spot.Eject and land to the ground is the most important factor in the game because if you land in the center of any map then there is 80% to 90% chance that you got killed first if you land second and last by the other players. So choose the right place to land. Try to land in the first because in ranked mode nobody wants to be killed first, everyone wants to strike and kill first.Every player has a special mind and they choose the special Character and other Character skills. So We tell you that which character do you choose and to play with other characters' skills. The first thing that we want to tell you that if you play solo the choose KLA character because It has the ability to damage the enemy by fist, in 1 fist you kill the enemy. The next thing is the Character Skills, every character has 2 skill slot then the 1 skill we attach with our character (KLA) is Andrew(It has the ability to reduce the damage on the vest by 12%), the second skill is the Kelly (Sprinting speed increase by 6%is Kelly's ability) It runs faster by the other players.We play Free Fire for over a year and with our experience that is avoid the Car, Jeep, Tuk-Tuk, or other things. Because if you take some of these you grab the attention of other players in that particular area. If you Don't take these if for sure you didn't grab any attention of others.Be with the Safe Zone, did not go far or middle in the inner area because it is higher chances to fire the enemy at you. Let's consider that if you are in the center then either 1, 2, or 3 enemies will shoot you and you got killed.You want to Push your rank then don't fight first with any enemy wait for them to fight with each other, if 2 or 3 players are fighting then try to grab the chance and shoot them because both are damaged and if you shoot you kill both enemies.Remember that, If you want to take a fight with an enemy long-range then you must have a silencer in your gun. Because Silencer did not revile your position with other enemies.Choosing Guns is an important factor if you do not have the right gun then it has a higher chance that you got killed by your enemy. So, we will tell you which gun do you choose to fight, and when that gun will help you. If the enemy is far from you then you have these guns like AK, Scar, Famas, and Groza (Groza is only Available in Bounty or AirDrop). The best gun in these 3 is AK, AK is the most dangerous gun in Free Fire along with Groza. The second thing is the close range, the guns to take a fight with the enemy in close range are MP40, M1014, or Spas12. MP40 is the best gun to take a fight with an enemy.Some players are so smart that they think that they grab the special guns which only found in Air Drops. If you want to push your rank then avoid these we tell you that why you have to avoid these. If you are going to loot that particular AirDrop then you are not the only one to loot that AirDrop other players are also want to loot that AirDrop, if you going to Loot first they will kill you. You have to look to hunt those enemies who loot first. So loot them first and looking to strick and kill them.Some players did not know how to use the grenade and kill the enemies, So don't go far we will tell you how to use the grenade and kill your enemy. If you are out of a house and your enemy is in this house then don't push to kill then there is a 50-50 chance to kill you and he killed you so damage your enemy with your grenade which you have. Throw the grenade in the right direction where your enemy is, and kill with the grenade, if he doesn't get kill by your grenade then damage your enemy then push and kill with MP40 or M1014.
