Golden Background: 2x Legend Combo Silver Background: 1x Combo Legend 6: 01: 21: 00 It appears that at least some, perhaps all, of the breeding combinations of Legendary monsters have been changed two days ago. So far the only combinations listed that are working are: Arch Knight, Darkzgul, Thorder, Lord of the Atlantis, Goldfield, Nemestrinus, Rockantium, Vadamagma New breedable Epic Monsters! Erpham, Drop Elemental, Tartarus and Darknubis epic are all confirmed as playable now! What is the average breeding time? The average time breeding is an estimate based on chance and how long it takes to raise each of the possible monster of a combination. It 's just a rough estimate at this time. Due to some shortcuts that I took, always I underestimate the amount of time. Below you will find our list of successoMonster Legends BreedingCombinations. Before you start reading this guide, keep in mind there are 4 Monster Tiers. The primoTier starts with Single ElementMonsters, which can be purchased at the store with gold. Then you start to create common and common hybrid monsters. With these monsters we progress ACreate more breeding combinations and start to get rare monsters, and the last tier is made of epic and legendary monsters. Most High is the most difficult level you get to get the expected monster shown in breeding pair shown in the chat below. TYPES OF BREEDINGAll'interno of 8 elements, we are opposed, which means that you will not be able to alleavereMonsters bringing those elements. For example, the nature and electricity are opposites, so sonoFire and Light, Earth and Magic, and Dark Water, Magic and EarthLe breeding combinations shown below do not guarantee a success rate of 100%, even less when you are trying to get a monster Rare, Epic, or Legendary. However, all have proven to work well. Surely you will have to try several times with some monsters The combinations are not officially linked to specific monsters. The elements are what chemateria, so if combined monsters that contain those elements, having been already achance to obtain the monster that you are looking for. Some pairs of monsters though, seem to work much better than others, even when they are the same elements. The Monster Book says there are 216 monster waiting to be unlocked. However, many of them are not yet available. If you are set to raise every single monster in the game and you need the right order to do this, just take a look at the Hatching Times, virtually indicating the rarity Monster, startout with those that require less time to Hatch. As long as you have two monsters with at least one element of the monster you are trying to reproduce them on each monster, there is a chance that you can get that monster when you train them together. If you remove all the veins, arteries and capillaries from your body and put them to an end, you'll die. -Neil Degrasse Tyson | curated by Haka Taka F Post613 Reputation: 191 It should be sticky. It is also useful to know which monsters are reproducible from zero, that is, both parents are reproducible from common ancestors. Esthired, Cthulhu, Gold Ra, Hyperion and of course Galante are not reproducible, making Arch Knight, Nebotus, Worker Hulk, Ultrabot and Laomu more difficult to get. All the other legendary are reproducible from scratch, although it may take a while to get some parents (Darknubis, Fayemelina and Drop Elemental all want us a little to get unless you are lucky). Could you add where you can get those unplayable parents? Galante must be bought. I have Hyperion, but frankly, I don't remember where I got him. I still miss Esthired, Gold Ra and Cthulhu. I think some of these can be available throughTaverna, but somehow I was not yet able to find 3 new ML players.
