Also known as the golden. Divine Proportion, and phi (pronounced 'fy' as in the word 'volar') the twenty-first letter of the Greek alphabet. He is also vaguely known as an aura ratio (1:1.618). Phi is intentionally or instinctively used in many different areas of design, for example architecture, music and art. Phi is also an easy "secret" to achieve aesthetically pleasant positioning and proportions. The golden ratio is found in various designs such as violins Stradivarius, the Pyramids, the Notre Dame Cathedral, and in nature, for example the human face. 3.14 159 - Pi, usually represented by the Greek letter pi (P) symbol ibone. Pi is normally used to calculate the area (ibone x square radius) or the circumference (Ïbone x diameter) of a circle. Pi has an infinite number of decimals, and fascinates mathematicians by calculating oneself, and memory experts memorizing as much as possible. 4/4 - Four beats to the beat, the most common rhythm of music. 10:10 - A British environmental campaign that asks companies, organizations and individuals to reduce their carbon emissions by 10% by 2010. 13 - The most superstitious number, 13 affects companies in surprising ways through absenteeism, cancellations and design. Western airlines, for example, tend not to have numbered seats and rows 13. Friday 13 is a particularly superstitious date. Friday and number 13 derive their superstitious reputations above all from Christian beliefs and Nordic folklore. 21-Gun Salute - Traditional honor given to royalty and heads of state, derived from the old sign of peaceful intent, when multiple shots virtually eliminated the immediate threat capacity due to recharge time. 24-Karat - The purest form of gold (Karat is American-English Orthography, too soft for jewelry, therefore the gold jewelry is made of 22 carat gold, 18 carats is therefore 75%Less than 10 gold carat generally is not sold as gold. The measurement of diamond carat is different, for which the carat is a weight measure (1 carat = 200 mg.) Society 24 hours - refers to a lifestyle available for many in the modern world in which people You can work socialize, buy, bank, etc. 24 hours a day. The phenomenon has caused a new significant thinking in business, management, marketing, etc. And it still does it. 24 hours a day, seven days a week. 38 Ways of persuasion - the classic semi-serous quide of the winning arguments that occur in the art of always being fair, by the German philosopher Arthur Schopenhauer (1788-1860.) 64,000 dollars / pounds - the question Key or crucial on a particular topic, deriving from an ancient American radio contest called Take It or Leave It, in which \$ 64 was the jackpot (it was an ancient show.) The show was published for the first time in 1940 (Finally in 1947), in which \$ 64 was the jackpot (it was an ancient show.) The show was published for the first time in 1940 (Finally in 1947), in which \$ 64 was the jackpot (it was an ancient show.) The show was published for the first time in 1940 (Finally in 1947), in which \$ 64 was the jackpot (it was an ancient show.) The show was published for the first time in 1940 (Finally in 1947), in which \$ 64 was the jackpot (it was an ancient show.) The show was published for the first time in 1940 (Finally in 1947), in which \$ 64 was the jackpot (it was an ancient show.) The show was published for the first time in 1940 (Finally in 1947), in which \$ 64 was the jackpot (it was an ancient show.) The show was published for the first time in 1940 (Finally in 1947), in which \$ 64 was the jackpot (it was an ancient show.) The show was published for the first time in 1940 (Finally in 1947), in which \$ 64 was the jackpot (it was an ancient show.) The show was published for the first time in 1940 (Finally in 1947), in which \$ 64 was the jackpot (it was an ancient show.) The show was published for the first time in 1940 (Finally in 1947), in which \$ 64 was the jackpot (it was an ancient show.) The show was published for the first time in 1940 (Finally in 1947), in which \$ 64 was the jackpot (it was an ancient show.) The show was published for the first time in 1940 (Finally in 1947), in which \$ 64 was the jackpot (it was an ancient show.) The show was published for the first time in 1940 (Finally in 1947), in which \$ 64 was the jackpot (it was an ancient show.) The show was published for the first time in 1940 (Finally in 1947), in which the jackpot (it was an ancient show.) The show was the jackpot (it was an ancient show.) The show was the jackpot (it was an ancient show the jackpot ('going out 'instead of' taking it '(the money of the prize). Giving a wrong answer ended the game and the potential money of the prize was lost. During the stage of 1940 the expression "six and four dollars" became popular in the United States referring to a very difficult question. The program relaunched by radio in 1950 as "the question of \$ 64" and worked for two more years. Reflecting the inflation, and most markedly the growing power of commercial television, the next relaunching of the show was in 1955 as "the \$ 64,000 question". The expression was adapted accordingly and has suffered and disseminated, despite the short life of the new 1955 television program and a couple of posterior relaunch attempts and name variations. More Expression is often adapted to refer to a sum of 64 million dollars or pounds, which is not savagely disproportionate with great money prizes in modern times. It's incredible to think that \$ 64 \$ 64 72 Rule - Most commonly known as the 72 Rule, with variations 69 and 70, these are standard figures used by financial people to quickly calculate the years necessary for an investment to double (or be reduced to half) to a given interest rate. Normally 72 is divided by the composite interest rate to give the approximate years. 72 is more popular than 69 or 70 because it is guite reliable and easily divisible by many different numbers. Rule 80/20 - The theory that 20% of the effort produces 80% of the results, and many similar effects; also known as the Couple Rule or the Couple Principle, by its originator. 86 - 'Secret' code used by restaurant and bar staff when they deny the service or expel a local customer and, more recently, when referring to an item from the menu that is not available, which is sometimes a lie to get the first meaning. The term has existed since the beginning of 1900 and no one knows the true derivation, although more nonsense is being suggested. 360 Degree Feedback - An evaluation method that normally involves feedback on a manager given by fellow workers. See the evaluations. Numbers A B C D E F G H J K L M N O P Q R S T U V W X And Z A la Carte, a grocery menu in which you can order individual dishes at different prices, or less commonly where you can ask for an accompaniment without additional charge, of the French phrase that means "to the menu". It is now increasingly applied to non-food services, where individual selections are offered instead of fixed provisions. A1 - Higher quality rating, applicable to various business situations, for example solvency, and more general references to theand aptitude for purpose. Abilene Paradox - A characteristic / cause of many poor or foolish decisions of groups or committees, in which the collective (unanimo or group) group or foolish by individual members, and/or is clearly wrong or foolish from a rational point of view. The term is from Jerry B Harvey's book The Abilene Paradox and Other Meditations on Management (Jossey-Bass, 1988:) a family decides to go to Abilene, as suggested by a family member who believes others might want to go, even though he did not have a strong personal vision. The trip was a waste of time, after which it emerged that no one wanted to go. The decision of the wrong group was caused by individual reserve and erroneous courtesy, assumption or evaluation of the true desires of others, along with the impulse to "follow the flock." The group members make false impressions of the group's preference and follow it blindly. The effect is related, but slightly different from a risk in elections and especially in tactical voting, so the collective effect produces a result that no one wants. This effect of "advanced group decision" can also be assimilated to group decision results represented by expressions such as "committee", both of which seek to illustrate that group decisions often produce poor quality results. The tendency is an example of heuristic thinking (specifically 'follow the flock'), where decisions are made instinctively and emotionally, rather than logically and emotionally, and is strongly related to the Nudge theory and the heuristics within it. Top of The Fold - Originally a newspaper editorial/advertising term that refers to the top half of the main page' (over the foldable) in terms of its immediate and optimal viewing position. More recently 'Hug the Fold' has been adopted and adapted for use in Internet terminology, where it refers to the best position (most read) in print/online media, so that it orders the highest demand/prices for publishing/advertising. advertising and especially considering the different screen sizes and layout of pages for the contents that can be seen online through PCs, smartphones, tablets, etc. Top of the Line - Marketing and advertising through the media, such as television, radio, newspapers, magazines, Internet, etc., which is less personal than the Marketing of bass. Companies often use advertising agencies for ATL marketing agencies for ATL marketing. See marketing agencies for ATL marketing produce goods cheaper than other countries. Summary - A brief summary covering the main points of a written article or research project. Accelerator - A company that supplies office space, marketing services, etc., in exchange for a payment, to help create new companies. Acceptance Bonus - The amount paid to an employee who agrees to perform a difficult task. Accessibility - It refers to the ease with which a public can receive, understand and act on communications and services of companies, large corporations, agencies, local and central governments. Accessibility is a relatively modern concept, which has become increasingly important since the end of the 1900s, especially with regard to public services, and particularly for disadvantaged, disabled or minority groups, However, the central concept and principles of accessibility are very relevant and important for all communicators, both at the personal and organizational levels. The main accessibility factors include: grammatical language and style, translation (when necessary), font size/print, font type/syle, design, ease(relative to electronic media), types/versions of media (web, printing, audio, video, as necessary), time and availability of information, details and complexity, esoteric, gobbledegook, legale. See writing tips. Accounts - Financial records of a person or company. An agreement to keep money with a financial institution, for example, a bank, build a society, etc. See Financial Terms. Accontrection - Growth or increase in the value or quantity of something. See Financial Terms. Cumulation of payments or benefits over time. Through the Board, the participation of, or affects all or all in an industry or company. Based costs â €
