HOW TO WIN AT CATAN:

Settlers of Catan Strategy and Tips by the Numbers

The game also continues to make an effort to perfect the fan-favorite Master League mode. After all, resources can be traded to the bank at 4:1 or at Ports for an even better return (see below). I have been caught off guard far too many times and have struggled to find a way to gain those last Victory Points. My fellow players, however, have clearly planned ahead. The game does provide opportunities to earn game currency as you play, which you can then use to purchase champions. You fight in competitions with up to four players, and the ultimate goal is to knock your opponent out of the arena to score points. Thing Two: Catan is won by having ten points. Those first two Settlements you placed before the game really started? They're worth one point each. If you have a resource someone really needs, push for a 2:1 or 3:1 ratio. And don't limit yourself to expecting only one type of resource in exchange for the one you have that they really need. Some teams and stadiums are only available with the paid version of the game, but fan favorites like FC Barcelona and Manchester United are included. If you're on the other side of this deal, instead of trading with players, trade with the bank. On your turn you may trade any four cards of a single resource for one card of any other resource. This is a steep exchange rate, but one that keeps your resources out of the hands of your opponents. Let's take a look at a few of the top-rated free PC games, according to Tech Radar and PC Magazine, across a range of genres. Don't Play Resources, Play the Odds One of my regular gaming friends likes to go after the Longest Road. I decided to try and follow this idea and focused solely on the two things necessary for roads: brick and wood. I soon learned that while the Longest Road is helpful, my approach to placing those first Settlements needed to be better balanced. Building a Settlement at one of the Ports will give you a better return. Some Ports allow you to trade in any two cards of a single resource for one resource of your choosing. Each year, new editions don't necessarily offer many new features versus previous years, but they do tend to introduce gaming improvements like better dribbling and player responsiveness. (See below) Respect the Development Cards When I started playing Catan, I didn't get Development Cards. Ore was always hard to come by and using ore to upgrade a Settlement to a City was a guaranteed extra point. Then I realized the more experienced players in my group were frequently buying Development Cards Development Cards are the only truly hidden element in Catan. A sheep, a wheat, and an ore gets you the top card from the deck. Once you read it, you lay it face down in front of you where it festers, creating suspicions amongst your opponents, until you choose to use it. Trade Big or Trade with the Bank Trading is a big part of Catan. Smite also features a rotating roster of free characters that can be permanently purchased with in-game currency or bought in packs with real cash. When someone is offering to trade for a resource, it's only because they need that resource for something that will help them towards gaining another Victory Point. Just how badly do you really need the resource they're offering? The ugly middle game starts around the time someone reaches six points. Roads have been built, and additional Settlements are bringing in once-scarce resources. Trading requests are met with narrowed eyes and slow shakes of the head. Photo Courtesy: @SMITEGame/Twitter Pro Evolution Soccer 2018 Lite Pro Evolution Soccer (PES) is one of the bestselling video game franchises of all-time around the world. Despite it being such a relatively simple game, there are some people who shrewdly manage to convert resources into points with speed and ease while others seem to be barely getting started by the time another player announces they've scored their tenth point and have won the game. Photo Courtesy: @FortniteGame/Twitter Even if you aren't playing with friends, it's easy to find a match to join, and the game is highly addictive. If gathering resources, building structures and shooting at your enemies is what you look for in a game, Fortnite is the game for you. Don't just surrender to the absolute randomness of the numbers that may or may not produce resources when the dice are rolled. Pay attention to the numbers — and not the resources — that, statistically, are the most likely to appear. Matches take place between five-person teams that focus on destroying their opponents' bases and towers. Screenrant gave this fighting game a "Very Good" rating. MORE FROM QUESTIONSANSWERED.NET Fortnite Fortnite is arguably the most popular of the Battle Royale games to hit the tech world in quite some time. Each character has its own set of weapons to use during a match. The game is played from a third-person perspective, making combat feel much more dynamic. When looking for intersections to place your first Settlements, pay less attention to the type of resource and more attention to the number of dots on the hex tiles that make up the intersections. The type of resource matters less than the frequency of obtaining them. The more dots, the more likely that number is to be rolled — meaning the more likely those resources will be handed out. Even if you don't draw a soldier, you're still going to be drawing a card that's helpful — possibly one of the City Building Cards that are worth one Victory Point each. You'll be the only one with that resource throughout the game — never trade it away. Brawlhalla The "brawl" in Brawlhalla pretty much says it all for this fighting game that is similar to the popular Super Smash Bros. League of Legends League of Legends uses a freemium model where characters rotate weekly, and certain extras cost money. League of Legends League of Legends is one of the most highly played multiplayer online battle arena (MOBA) games available for the PC. When it comes to escaping the real world and killing a little time, it's hard to beat the magic of some PC gaming. Consider placing a Settlement in the most advantageous intersection of those tiles, then build roads and additional Settlements around them to block your opponents from doing the same. Don't expect to master the complexities of this game overnight, but the action starts as soon as you click the "play" button. After my most recent back-to-back losses I decided to take a closer look at Catan and see what I've been doing wrong and, more importantly, what I should start doing right. Here's what I've learned. Focusing on gaining wood and brick will allow you to expand your road system. Build five contiguous road segments and you claim the Longest Road tile and the two Victory Points that come along with it. For instance, if you're counting on the extra points Cities give you as part of your winning strategy, make sure you have good access to ore. If that Longest Road or Largest Army is essential to your win, you need to keep those numbers up so no one steals it away from you. Photo Courtesy: @officialpes/Twitter The "Lite" version of Pro Evolution Soccer is free and gives players access to the Online myClub and PES Matchday Mode in addition to playing in Local and Co-op Matches and honing their skills in Training Mode. As with the Longest Road, the Largest Army gets you two Victory Points as long as you can hold onto it until the end of the game. Balance Longest Road with Additional More Resources Building roads and Settlements are the best way to expand your ability to gain resources on a given turn. When you play the odds you can gain those cards either through dice rolls or through trading. Photo Courtesy: @Brawlhalla/Twitter Smite Smite is another popular MOBA, this one with its champions being gods from ancient pantheons and classic myths. by Nintendo. Soldiers dominate the Development Cards, but other good cards can be drawn as well. Think that sounds bloodthirsty? Two Last Things to Remember Thing One: Sometimes the dice roll with you, sometimes they don't. You need to be flexible in your strategies if the dice roll against your initial plans. Photo Courtesy: eclipse images/E+/Getty Images With the world still dramatically slowed down due to the global novel coronavirus pandemic, many people are still confined to their homes and searching for ways to fill all their unexpected free time. Numbered discs with dots representing the 2D6 likelihood of being rolled Each hexagonal resource tile in Catan gets a random chit placed on top of them. Each chit shows the number that needs to be rolled to produce the resource represented to any player with an adjacent Settlement. Below each number are a series of dots. In this game, you must coordinate with your teammates to destroy the opposing team's base. More importantly, how badly do they need the resource you have? Friendly trading takes place at a 1:1 ratio — say, one wheat for one ore. But friendly trading doesn't win games. That means Catan is really only about scoring eight Victory Points. If you're worried about what a gaming hobby could do to your tight budget right now, we've got you covered. Monopolize and Conquer While the introductory game comes with a recommended board layout, later games are played on a randomized hex tile layout. Take a close look at these random layouts at the start of the game. The two and twelve chits get a single dot because they each take a very specific roll (each die rolls one; each die rolls six) to achieve. Six and eight? Trades take place, roads and Settlements get built. Everyone is smiling and fairly even on points. Like League of Legends, Brawlhalla engages in a weekly rotation of playable characters, but you can always purchase your favorites using in-game currency you collect as you play. The game dumps you into a world with 99 other players, where you engage in a free-for-all battle until only a single player is left standing. Those unplayed Development Cards start looking more ominous — they're even more likely to be ones worth an additional point. Here are the Top Six ways I've learned to help me stop my losing streak and become a more competitive Catan player. Later in the game, however, things are different. You're on your own — and opportunities to score additional points have become much, much harder. But be careful with this strategy, since someone else can easily build a longer road and steal your hard earned points. Are there two of the same resource next to one another? Is at least one of the numbered chits on those tiles reasonably high? Given the distribution of the types of Development Cards in the deck, the odds are that you're likely to draw a soldier. That's not necessarily a bad thing: soldiers can be used to move the Robber off of one of your tiles, or just to move it to a place that will hinder your opponents. Even better, three soldiers gets you the Largest Army card. These dots indicate how likely that number is to appear on a given roll of the two dice. Eight. Make each point you score — and each point you prevent your opponents from scoring — count. PC Gamer rated Smite an 86 out of 100, with particularly high marks for its arena combat. When Catan (or The Settlers of Catan, as it was originally named) was first published in 1995 it created something of a revelation in board game circles, undeniably changing the way people would look at board games and gaming in general. Part of Catan's success has been due to designer Klaus Teuber's ability to combine different gaming mechanics (resource management, trading, route building, dice rolling) in a way that made the game easy to teach and learn, while maintaining enough depth to make the game challenging for serious players. Photo Courtesy: @LeagueOfLegends/Twitter The game rewards careful tactics and good teamwork and is always free to play, but if you want to keep your character after a week or add any special features and enhancements to your game play, you will have to pay a fee. Be adaptable in your game plan and smart about each one of those points and, like me, you should find your chances of winning improving with each game. Well, one of the best parts about the game is that you can play with your friends — regardless of which platform they have, PC or gaming console — so get ready for some "friendly" backstabbing. Plan Ahead for Your Last Two to Three Points Catan can be a friendly game for the first several rounds. In the early rounds, when everyone is looking to expand, I've noticed people are often willing to freely trade with other players. Different strategies require different resources, so exchanges can almost seem friendly. Your long road also allows you to build additional Settlements. This not only increases your chances at those additional Settlement resources, but also influences what tiles your opponents have Settlement access to and, therefore, what resources they can produce on a roll of the dice. If you can isolate an opponent to a small area of the board, you can decrease their chances of winning considerably. After seven, these are the most likely to be rolled. The fun of gaming gets even better when you find games you love that you can play for free on your PC. Is it really worth giving them another point? Looking to improve your Settlers of Catan game? Blue possesses the Longest Road and the two points that comes along with it. Catan is a dice game. Given that, be smart. In a game that's all about resources, sometimes you need to be cutthroat to win.
