Pixel Gun 3D - The original shooter on Android. Its peculiarity resides in the fact that visually the game resembles the infamous Pocket Minecraft edition. The interface and all the elements of play are made in a square-cubic style, including characters and weapons. This is the first project of Rilisoft Ltd, which, moreover, has immediately suffered a great popularity among mobile players. The gameplay remembers the old strike. Players are divided into two teams and transferred to the paper on which battles are fought. The team that wins more enemy wins. The player should explore the locations, look for enemies and destroy them at the first opportunity. A game currency is awarded for victory and experience, which is necessary to get the level. The 3D pixel gun a large number of places. To connect to the game, just select the map you like and see if there are places currently available. Initially, the protagonist only has a knife, a gun and a gun. In the future, you can buy new ammunition and other improvements in a special game store. In addition to the command mode, there is also a cooperative in which the group generated players faces face to face with the crowd of monsters bloodthirsty.management in the game is intuitive, but not the cheapest. The virtual joystick on the left is quite reactive, and it is convenient to manage the movement in principle. The right side looks too loaded, and on small diagonals while they lead fire and curves, it is possible to accidentally pass to the garnets, which can lead to the death of the main character. In general, Pixel Gun 3D is a representative representative of its category. Development of thoughtful characters, many levels and correspondence methods of death please fans of old school shooters. "Pixel Gun 3D" is a sandbox game, but the subject has changed firsthand shooter, then what kind of experience will give to the player? Let's take a look. Needless to say, on the screen of course, here, whether it is characters, zombies or tanks in the map, in cars, buildings, etc., and also the effect of the explosion are all sandboxed and the effect of mosaic without The sniper mode, can see very clearly. In music, with fast-rhythm music, the flavor of Battlefield, like a variety of weapons, the sound is varied. The operation is basically the same with the normal shooting game, click on the right side of the screen to move anywhere, you can adjust the orientation of the upper and bottom left and right, at the bottom right is the shooting and jumping, the shooting and the jump over is the clip change and open the view, the lower left is the steering wheel the operation is quite smooth, but changing the position of the clip and open the view is not very good. Often when you move to target the azimuth, clicking to change the magazine or view, delay the times of the fire and hit the zombie. The right to the right right of the screen is the weapon switch, in this position using the scroll gesture to pass. The game is divided into three modes: history methods, infinite mode and multiplayer mode. Plot mode to expand the module level, players must destroy each level in all enemies and the final chief. The infinite mode will be in an arena, there will be numerous monsters and all the guns and the objects of stage, the experience is very exciting and refreshing. The multiplayer online battle mode should be considered a highlight, in this mode it can be with local or global players fired together, but also in this model can see a lot of user-generated content. For a shooting game, the weapon system is very worried about, in this fact, there are a large number of arms options Being divided into five specifications: melee weapons: knives, swords, sticks, hammers, etc.; Gun: six hair revolver: AK47, M4A1 and other famous guns can see, sniper gun: here is the sniper gun at Spike level, very cattle; The last is a wide range of anti-personal weapons. After the purchase it can also update the capacity of weapons, but it also needs money a a Many weapons are right, but everyone needs their efforts to obviously not exclude direct purchase .apkaward.com Props rarely, just to add ammunition, shields and increase life, these props canceled randomly on the map here Xiaobian To remind everyone in the printing mode, the map is very large, players in addition to the elimination of zombies, mainly to find ammunition, because the ammunition is very limited, and in this, they affect the head and cannot spike zombies And the monsters, but they can't always use weapons to melee, so the game for most of the time running map, look for ammunition supplements, then shoot enemies. Furthermore, the game also has the purchase of fashion and people need money, the actual use of small, in the case of money is still preferred to buy a weapon, a gun in the world I have ah! Overall the game is still good, as well as a slightly uncomfortable operating setting, the game in the content, the mode has a relatively large reproduction.
