The bronze is worth about \$ 1.20 to \$ 1.60 per pound (\$ 0.08 to \$ 0.10 per puppy) when sold to scrap. For more details on the bronze scrap prices, see below. Latan scrap medium price is about \$ 1.20 to \$ 1.60 per pound, or \$ 0.08 to US \$ 0.10 per united moment of writing. [1] [2] Note that the exact bronze value depends on the current scrap market conditions, which may vary by location and float regularly. Identifying bronze bronze can be found in plumbing materials such as tubes, [3] as well as springs, tools and decorative items such as sculptures. [4] It is made mainly of copper and mixed with tin, sometimes a minor percentage of other metals like aluminum. It has a dark brown color and it looks different from brain because you can see weak dormer in metal (in addition to your color bite). [5] Getting the best price the purest your bronze, more money will be worth. If you are looking for scrap items, look at the bronze that contains more copper. [6] [7] If you have a bronze, but you are not sure what kind of alloy, consider the following types (sorted from those who are usually worth more): [8] Aluminum bronze: Used in the Petrochemical and water supply bronze water: Used for velvules, puppies, gears, nuts and silicone bronze and bolts: Used for bombs and velvules Bismuth Bronze: Found in Bearings and Kitchen Utensils Historic Bronze Bronze : It has high lead content and is often used for bearings and bushings Bronze Force: Used for components, instruments, washers and springs Bronze copper-nail: Used à € à € à € . velvules and other marine equipment, it is clear, you can also earn more for the bronze scrap if you sell a large amount for a suscat volume; A pile of bronze tubes is more attractive to buyers than just a few tubes. If you have any latan that contains more copper than the rest, do not let you separate it into different piles to get the best price. [6] For pieces that can be of value on the own account, instead of scrap, as bronze sculptures, you may want to check again with an art expert and evaluate it. You can find art experts at universities, libraries, art galleries or auction sites. ValuemyStuff and art assessment are two easily accessible online sources for the evaluation of things like sculptures. How does bronze compare to other metals? There are two categories of metals to be considered when selling: ferrous and non-ferrous. Ferrous metals contain iron; Non-ferrous metals are less commonly recycled, more durable à € à €
