MyWeb It's time for turkey trivia! Can turkeys fly? What's a baby turkey called? Impress at the Thanksgiving table with these turkey facts! Are Turkeys Native to the Americas? Yes, turkeys originated in the "New World." Specifically, wild turkeys are native to Mexico. It's a funny history. European explorers brought wild turkeys home with them in the early 1500s. The birds were domesticated in Europe and later brought to North America by English colonists. Note that domesticated turkeys have white-tipped tails; wild turkeys have dark-tipped tails. Why Do Turkeys Gobble? Only male turkeys, or toms, can make a call known as a "gobble," and they mostly do it in the spring and fall. It is a mating call and attracts the hens. Wild turkeys gobble when they're surprised by loud sounds and when they settle in for the night. The wild turkey can make at least 30 different calls! Could the Turkey Have Been the National Bird? Ben Franklin thought the turkey would be a better national symbol than the bald eagle. According to the Franklin Institute, he wrote in a letter to his daughter: "For my own part, I wish the bald eagle had not been chosen as the representative of our country; he is a bird of bad moral character; he does not get his living honestly...like those among men who live by sharpening and robbing...he is generally poor, and often very lousy. Besides, he is a rank coward; the little king-bird, not bigger than a sparrow, attacks him boldly and drives him out of the district...For in truth, the turkey is in comparison a much more respectable bird, and withal a true original native of America. Eagles have been found in all countries, but the turkey was peculiar to ours..." How Much Turkey Does a Person Eat per Year? The average person in the United States will eat 15 pounds of turkey this year. What's That Weird Wobbly Thing on a Turkey's Neck? The loose red skin attached to the underside of a turkey's beak is called a wattle. When the male turkey is excited, especially during mating season, the wattle turns a scarlet red. The fleshy flap of skin that hangs over the gobbler's beak is called a snood and also turns bright red when the bird is excited. The wobbly little thing on the turkey's chest is the turkey's beard and is made up of keratin bristles. Keratin is the same substance that forms hair and horns on other animals. Is the Turkey Considered a Game Bird? Yes, but the wild turkey is one of the more difficult game birds to hunt. It won't be flushed out of the brush with a dog. Instead, hunters must try to attract it with different calls. Even with two seasons a year, only one in six hunters will get a wild turkey. By the 1930s, almost all of the wild turkeys in the U.S. had been hunted. Today, thanks to conservation programs, there are plenty of wild turkeys—they even invade cities and suburbs! Are Turkeys Named After Turkey, the Country? When Europeans first encountered the wild turkey in Mexico, they incorrectly classified the bird as a type of guinea fowl called a turkey fowl. It was Turkish traders who originally sold guinea fowl from Africa to European markets; Turkey has no native turkeys! What Is a Baby Turkey Called? And What About Adult Turkeys? A baby turkey is called a poult, chick, or even turklette. An adult male turkey is called a tom and a female is a hen. How Big Do Turkeys Get? The domestic tom can weigh up to 50 pounds, the domestic hen up to 16 pounds. The wild tom can weigh up to 20 pounds, the wild hen up to 12 pounds. Can Turkeys Fly? The wild turkey can fly! (It does, however, prefer to walk or run.) The domestic turkey is not an agile flyer, although the bird will perch in trees to stay safe from predators. How Long Do Turkeys Live? The average life span of a wild turkey is three or four years. It generally feeds on seeds, nuts, insects, and berries. The average life span of a domestic turkey, from birth to freezer, is 26 weeks. During this period of time, it will eat about 75 pounds of turkey feed. What's your favorite turkey fact? Let us know in the comments! Learn More Turkeys are, of course, best known for being the main course at Thanksgiving. Learn how to cook a turkey and see our favorite Thanksgiving recipes! This category is for questions and answers related to Turkey, as asked by users of FunTrivia.com. Accuracy: A team of editors takes feedback from our visitors to keep trivia as up to date and as accurate as possible. Complete quiz index can be found here: Turkey Quizzes There are 26 questions on this topic. Updated Jul 16 2021. Cite There are a number of explanations for the origin of the name of Thanksgiving's favorite dinner guest. Some believe Christopher Columbus thought that the land he discovered was connected to India, and believed the bird he discovered (the turkey) was a type of peacock. He therefore called it 'tuka,' which is 'peacock' in Tamil, an Indian language.Though the turkey is actually a type of pheasant, one can't blame the explorer for trying.The Native American name for turkey is 'firkee'; some say this is how turkeys got their name. Simple facts, however, sometimes produce the best answers?when a turkey is scared, it makes a "turk, turk, turk" noise.According to the U.S. Department of Agriculture, more than 45 million turkeys are cooked and eaten in the U.S. at Thanksgiving?that's one sixth of all turkeys sold in the U.S. each year. American per capita consumption of turkeys has soared from 8.3 pounds in 1975 to 18.5 pounds in 1997 and has remained stable at about 16 pounds since 2011.In 2014, 235 million turkeys were raised. Compare this with the record low of 17.1 million birds in 1930, and the record high of 302.7 million in 1996.Turkeys are fed a diet of mainly corn and soybean meal along with a supplement of vitamins and minerals. They grow to full maturity in about 4 to 5 months, depending on the desired market weight.Only tom turkeys gobble.Age is a determining factor in taste. Old, large males are preferable to young toms (males) as tom meat is stringy. The opposite is true for females: old hens are tougher birds.A turkey under sixteen weeks of age is called a fryer, while a young roaster is five to seven months old.Turkeys are the only breed of poultry native to the Western Hemisphere.Turkeys have great hearing, but no external ears. They can also see in color, and have excellent visual acuity and a wide field of vision (about 270 degrees), which makes sneaking up on them difficult. However, turkeys have a poor sense of smell (what's cooking?), but an excellent sense of taste.Domesticated turkeys cannot fly. Wild turkeys, however, can fly for short distances at speeds up to 55 miles per hour. They can also reach speeds of 25 miles per hour on the ground.Turkeys sometimes spend the night in trees.Turkeys can have heart attacks: turkeys in fields near the Air Force test areas over which the sound barrier was broken were known to drop dead from the shock of passing jetsThe ballroom dance known as the Turkey Trot was named for the short, jerky steps a turkey makes.For more turkey facts see Fowl FAQs.More Thanksgiving Features. .com/spot/tgturkeyfacts.html Ready to challenge yourself?
