# Free keyboarding practice exercises

Keyboard Revolution, Desert Typing Racer, The Frogs are Off Their Diet, Spacebar Invaders, Meteor Typing Blast, and more! The best free games to learn to type are right here. Learn to type the easy way. Our complete lesson based typing tutor will teach you the keyboard, 2 keys at a time. A certificate is awarded on lesson completion! Get a precise words per minute assessment from our 1 to 5 minute timed typing test. Receive a free printable test certificate or PDF. Are you the fastest typist on the internet? Touch typing is a way of typing where you type without looking at the keyboard. It is a skill obtained through typing practice where you know what each letter is, and your fingers automatically start typing. Through practice, muscle memory develops to store the location of each letter on the keyboard and thereby increase your typing speed to a great extent. There is no better alternative than typing practice to improve your typing speed. The more you practice with letters, numbers, sentences, etc., will largely help in improving your typing speed. Other than that, the following tips will help you to improve your typing speed. 1. Always maintain the correct posture 2. Don't try to look down at your hands 3. Always start by resting your hands at the home row marking 4. can the document fully before you start typing · Touch typing is all about the idea that each finger has its own area on the keyboard. Thanks to that fact you can type without looking at the keys. Practice regularly and your fingers will learn their location on the keyboard through muscle memory. Sitting posture for typing Sit straight and remember to keep your back straight. Keep your elbows bent at the right angle. Face the screen with your head slightly tilted forward. Keep at least 45 - 70 cm of distance between your eyes and the screen. Expose the shoulder, arm, and wrist muscles to the least possible strain. The wrists can touch the tabletop in front of the keyboard. Never shift your body weight to the wrists by resting on them. Home row position Curve your fingers a little and put them on the ASDF and JKL; keys which are located in the middle row of the letter keys. This row is called HOME ROW because you always start from these keys and always return to them. F and J keys under your index fingers should have a raised line on them to aide in finding these keys without looking. Keyboard scheme The color-coded keyboard under lesson input field will help you to understand which finger should press each key. Hit keys only with the fingers for which they have been reserved. Always return to the starting position of the fingers "ASDF – JKL;". When typing, imagine the location of the symbol on the keyboard. Establish and maintain a rhythm while typing. Your keystrokes should come at equal intervals. The SHIFT key is always pressed by the pinky finger opposite to the one hitting the other key. Use the thumb of whichever hand is more convenient for you to press the Space bar. This method may seem inconvenient at first, but do not stop, eventually, you'll find out that you are typing quickly, easily, and conveniently. To achieve the maximum result, choose a touch typing course for your keyboard layout and in the desired language. Fingers motion Don't look at the keys when you type. Just slide your fingers around until they find the home row marking. Limit your hand and finger movement only to what is necessary to press a specific key. Keep your hands and fingers close to the base position. This improves typing speed and reduces stress on the hands. Pay attention to ring fingers and little fingers, since they are considerably underdeveloped. Typing speed Do not rush when you just started learning. Speed up only when your fingers hit the right keys out of habit. Take your time when typing to avoid mistakes. The speed will pick up as you progress. Always scan the text a word or two in advance. Pass all typing lessons at Ratatype. It will help you to get above the average typing speed. Take care of yourself Take a break if you feel that you get distracted easily and are making a lot of mistakes. It is more productive to come back when you feel refreshed. Psst! You could have more fun with groups. Invite your friends for collective studies and competitions. Groups work well for teachers too. Click on a typing lesson on the list below. The exercisewill begin as soon as you press the first key.Start random lesson Fun Typing Practice! 131 Free Games for Kids and Adults Keyboarding starts in Elementary Digitalization has brought laptops, Chromebooks, PCs, and tablets into everyday use in schools. Even kindergartners are already using different devices to learn new things. The keyboard is an essential part of using digital devices, and practicing to touch-type is gaining more and more momentum. While the smallest of learners don't need to know how to touch-type when going to school, it's never too early to get familiar with the keyboard. Typewriter games on our website provide a welcome practice for learners, starting their keyboarding lessons later on. Studies show that kids build a positive, rewarding, and encouraging relationship for typing through playing typewriter games. Young learners can start with easy introductory games such as Key Memory Game, which improves both concentration and keyboarding skills. This brain game enables kids to train their memory, and the goal is to memorize and find pairs of the same cards and finally turn over pairs of matching cards with the keyboard. Kids are not required to learn how to type, but they will start learning the keys on the keyboard, which helps when learning to touch-type later on. How to teach where all the letters are on the keyboard? Learning the entire keyboard can often be difficult. Fingers that are being used for typewriting should be limited to very few in the beginning. Our gaming website offers the ability to learn different portions of the keyboard at once. Home row, extended home row, upper row, all letters, a combination of letters and numbers, and 10-key options headline the different courses of action for the individual. This can benefit the teachers in the sense of a proper lesson plan. The teacher can ask everyone to start with home row keys only (with our Dance Mat and Type And Run Game) and then progress slowly to all letters on the keyboard with KeyMan and KeyTower. After each key has first been trained separately, it's a good time to start to type words by playing TypingRace and TypingAttack. This kind of "bottom to up" learning process supports all kids. The development of various free keyboarding online web sites (TypeTastic, BBC Dance Mat, TypeMaster, TypeTrainer, TypeQuest, Typing Web, etc.) has made some incredible progress in recent history. Students have been able to benefit from the new innovations and teachers have gotten useful tools to promote valuable keyboarding skills. Nowadays keyboarding practice lessons can be more fun than ever in history! Now you can arrange a short summer keyboarding camp every day. What are the primary advantages of keyboarding skills for kids? The fingers will develop the muscle memory. Hand-eye coordination gets a lot better. Alternative method for students having issues with handwriting. Increase words per minute speed and accuracy. Kids learn also spelling words and vocabulary. Better work opportunities when kids are adults. Page 2 Typing Trainer is a web course that teaches you the efficient touch-type method for free. As a result you can double your typing speed and eventually type as fluently as you speak. With our step-by-step approach you will learn the core keyboarding skills in web in just four hours - after that you're ready to use your new skill in everyday work. There's also over five hours of additional material covering speed building, numbers, symbols and more. Each lesson introduces a couple of new keys and provides a step-by-step training program from warm-ups and key drills all the way to fluent text entry. The on-screen keyboard makes learning new finger movements intuitive as it visualizes the paths your fingers should follow. Before introducing new keys your fingers are warmed up and oriented for the new movements - this will make learning much easier and faster. Once you've learned the new key locations, they are integrated into the fluent typing process with varying word and text drills. During training our web course detects those words you have difficulties with and then creates a targeted review exercise to hone them. At the end of each lesson you can assess your current skills with a Skills Test to see if you need some extra practice. © 1992-2021 TypingMaster, Inc. All rights reserved. Privacy policy - Disclaimer More than ever, typing is an essential part of learning. Developing this skill doesn't have to be boring, though! In fact, there are many great typing apps for students that are engaging, interactive, and educational. We've put together this helpful list of some of the best options for elementary, middle, and high school kids! Best Typing Apps for Students in Elementary School Alpha Munchies Inspired by Atari's classic game, Space Invaders, kids will target little pixel aliens by typing the letters that appear above them. There are multiple levels of difficulty, making this a good choice for elementary kids of all ages. Animal Typing Animal Typing simplifies touch typing for elementary students. It's extra fun because the animal kids will use (snail, rabbit, horse, etc.) depends on their typing skills. The faster they type, the faster their animal becomes! Cup Stacking – Keyboarding Kids will practice using the home row quickly as they stack and un-stack the cups by typing the keyboard characters on them. Dance Mat Typing Kids can move through four levels to play, starting by learning the home row keys. Every level is divided into three stages, with each building on previous lessons. The levels end by allowing students to test their typing speed before earning fun rewards! Ghost Typing Ghost Typing is an educational game for students of all ages. Players must keyboard the letters that are on the ghosts before they get too close! Keyboarding Zoo Early elementary age kids will love being cheered on by cute little animals as they learn to use their index or pointer fingers to match letters on the screen to their keyboards. KeyMan Borrowing from Pac-Man, this typing game has KeyMan fleeing ghosts and eating dots as he moves through a maze. Along the way, kids will need to use different letters that appear on the screen to help him find the right path. Keyboard Fun Designed by an occupational therapist, this typing app for students of all levels is colorful and engaging. By matching keys to pictures, Keyboard Fun encourages kids to learn the placement of keys on the keyboard. Nitro Type Race to see who can type the fastest! This game allows kids to improve their typing skills while competing in fast-paced races with up to 5 typers from around the world. They can compete against friends, earn new cars, track scores, and so much more ... all for free! Owl Planes Racing Owl Planes Typing is an educational multi-player racing game that allows students from anywhere in the world to race one another while practicing typing and keyboard skills! Type-a-Balloon This game is so simple but incredibly fun. Students need to type the letters that appear on the balloons in order to pop them! Every time a balloon "escapes," they'll lose one of their five lives, and an incorrect response will result in lost points. As their skills improve, kids can move up to a more challenging level. Type Type Revolution Inspired by the popular game Dance Dance Revolution, this will have kids' fingers dancing and learning. Players can choose one of ten songs to "dance" to as they learn key recognition skills. This activity might be best for older students who can type without looking. TypeTastic 700+ free typing activities for all ages means lots of typing learning here! You'll find introductory games, touch typing, fluency, and timed tests. Typing Fingers Spread over 32 levels, this app supports kids as they learn basic keyboarding skills from an early age. They'll work on identifying letters, numbers, and symbols as well as memorization. After successfully completing the final test, students will receive a typing certificate! Typing Pal Online If you're looking for great exercises to help kids practice correct finger placement on the keyboard, this is it! Students can choose from four environments, each with its own cool animations. They can also take typing tests to earn certificates of achievement. Typing Rocket In this keyboarding app, students will have 60 seconds to pop the rockets by typing the letters that appear on them. The game gets progressively more difficult as the time winds down. If this is too challenging, kids can try Typing Rocket Jr instead! Best Typing Apps for Students in Middle and High School Keybr This free online typing tutorial helps students practice touch typing skills while improving speed and accuracy. Keybr provides an advanced learning experience as it uses statistics and algorithms to generate lessons based on each student's skill level. Keyblaze KeyBlaze starts with basic lessons on the home keys and neighboring keys, then continues with capitalization, punctuation, and numbers. It also includes practice lessons using poetry, prose, and problem keys, and advanced typing tests. Learn Typing This site offers lessons for students of all ages and typing abilities. Designed by a high school typing tutor, kids can improve speed and accuracy and build confidence through typing tests, games, and video tutorials. TapTyping This app provides focused lessons designed to boost typing speed and accuracy very quickly. Students can see a heat map of where their fingers are hitting the keyboard to better understand where they can make improvements. The advanced levels will take them through tough tapping patterns, symbols, numbers, and complicated sentences. Type Racer This typing improvement tool helps students learn to type 60 to 120 words per minute. Kids can practice on their own or race their friends! Typesy This highly interactive application teaches standards-based, common core content that encourages students to improve typing speed and accuracy through fun activities, games, and courses. Typing.com Typing.com is a comprehensive website that really has it all. Students begin by taking any number of tests to evaluate their typing skills. Then, they use engaging curriculum, gamified learning, and even multilingual content and instruction to take their abilities to the next level. TypingClub With over 600 lessons, TypingClub is one of the most comprehensive and accessible typing programs available. Students can engage in interactive experiences that take them from learning individual keys all the way through reaching a goal of typing 75 words per minute. The lessons include educational games, cross-curricular content, and instructional videos. Typing Master This complete touch typing application features a real-time analysis widget that tracks typing skills and creates tailored exercises based on performance. It's highly adaptable, giving students a customized experience to maximize learning potential! Typing Pal Typing Pal is a simple and efficient web-based program for beginners and intermediates who want to touch type at full speed! What are your favorite typing apps and games? Share in the comments below. Also, check out 10 retro games that are still fun to play!
