This list includes Bible schools as well as other schools with strong Bible programs. All the Bible schools on this list are also Christian schools, but not all Christian schools here are Bible schools. These two overlap a lot, but there are some important differences between them."Bible schools" are essentially specialty training schools in Bible. Meanwhile, liberal arts Christian schools like Biola, Liberty, or Regent, devote considerable time and energy towards a well-rounded education including science, math, history, literature, art, and so on. Christian schools can have great programs in Bible, but they just aren't as narrowly focused on Bible like Bible schools are. Students can graduate from liberal arts schools with a degree outside of Bible or ministry, perhaps taking only one or two core classes in Bible. Liberal arts schools also tend to incorporate a lot of non-biblical influences from philosophy, science, literature, and culture studies. In some ways this variety can explore biblical implications and applications and can even enlighten one's reading of the biblical text.Bible schools, on the other hand, focus their curriculum on studying and understanding the Bible itself. These schools are not, generally, liberal arts schools (with the exception of Cedarville University), they are specialty schools. So, they lack a measure of breadth but they make up for it in depth, with more Bible classes, more Bible-centered study, and more institutional focus on the Bible. Students at these schools are required to take core Bible classes, even if they pick the most peripheral "non-biblical" major. Bible schools also tend to identify with a denomination or theological tradition. The result is that Bible colleges reserve the time and focus to dive deep and explore their school of thought. Bible schools, like Moody, Baptist Bible College, and Emmaus, identify most or all their degree programs within some field of Bible, missions, or ministry training.Collectively, Christian schools and Bible schools serve a vital role in faith and learning in America, and many Christian colleges are expanding their reach with online degree programs. Historically, many Christian schools grew out of the spiritual morass left behind when traditionally Christian colleges—like Harvard, Princeton, Yale, and William and Mary—veered a secular direction away from their Christian roots. And the Bible school movement specifically can be traced back largely to Dwight L. Moody and Moody Bible Institute. Christian and Bible schools gradually grew in the late 19th and early 20th Century. Today we find Christian and Bible schools steadily emerging as a counter-cultural trend empowering Bible-focused training in higher education.Header Image Credit: SDI Productions | Getty Images
