It is basically a software that allows its users to play mobile games using a standard keyboard and mouse. Players basically download the software on to their smartphones and enable it before connecting their devices to the hardware components. The software is compatible with a number of games including the likes of Player Unknown Battlegrounds Mobile (PUBG Mobile) and Army Attack. It is free software that can be downloaded from Tencent's official website. How to Download Tencent Gaming Buddyor PC You can download Tencent Gaming Buddy combined with the PUBG Mobile installer by clicking the download button below. How to change the Chinese Language in Tencent Gaming Buddy to English To change the language pull the dropdown menu and chose one Chinese option which will turn out to be Settings. Then navigate to another dropdown where you will be able to choose English or another language. Still unsure? Watch the video below. it should prove to be helpful. The Settings & the Review Essentially, the language Tencent Gaming Buddy Software operates in is English and Chinese, however, thanks to some brilliant designing, it hardly requires any human interaction. Users are only required to go the website and simply install the software. Once that is done, the setup menu will install both the software and the games along with it. Giving the example of PUBG Mobile, the software works in relatively simple terms. Users can open the game directly from their phones and the players can check to see the controls which, by then, will be converted accordingly as if it were on a personal computer. Playing PUBG Mobile on Tencent Gaming Buddy To further act as proof, players can directly play the game as it will have the same controls with the mouse acting as the main source of aiming whereas, the keyboard working simultaneously to perform different actions such as jump, interact, and run. PUBG itself is an online multiplayer game that allows players to compete against one another. It is a game which features quite complex controls as players are required to perform multiple actions at the same time. The game itself is very intriguing to play as it offers an open-world environment where one hundred players land on the ground and collect weapons in order to take down their opponents. All these complexities within the game can become quite difficult to handle at the same time and this is where Tencent comes in. By providing an environment where players can play using their mouse and keyboards, character control and improvisation can improve to a great extent. One of the rare downsides of this game is that it only allows players to play in PC servers. The software limits the users as it does not feature console servers. This basically acts as a safety valve as well since playing in other servers could cause the software to become corrupted through numerous bugs, thereby creating an imbalance. Playing in PC servers means that the opponents the players face will also pose a greater challenge as they will be making use of the same keyboard and mouse facilities. However, the players will have a better chance of performing well through the ease provided thanks to the Tencent Gaming Buddy Software.
